**Correction to:** Bern et al. *Journal of Eating Disorders* (2024) 12:66

<https://doi.org/10.1186/s40337-024-01018-8>

Due to typesetting error, the “Plain English Summary” section in the Original Article was incorrect. Some sentences were cut as follows:

There is limited evidence to guide management of children and adolescents with Avoidant Restrictive Food Intake Disorder (ARFID) admitted for ARFID, which led to the development of a multidisciplinary standardized inpatient clinical pathway (ICP). The ICP centers the experience of the patient and family with an increased standardized care for inpatients with ARFID with variation in care reduced: There were improvements in the use

of psychiatry/psychology and social work consulting protocol. Future research is needed to better understand the impact of the inpatient clinical pathway to improve care over time.

The correct Plain English summary is as follows:

There is limited evidence to guide management of children and adolescents with Avoidant Restrictive Food Intake Disorder (ARFID) admitted for medical stabilization. The study describes the variation in inpatient care for ARFID, which led to the development of a multidisciplinary standardized inpatient clinical pathway (ICP). The ICP centers the experience of the patient and family with an emphasis on biopsychosocial support. Implementation of the ICP increased standardized care for inpatients with ARFID with variation in care reduced: There were improvements in the use of psychiatry/psychology and social work consulting services and a reduction in the use of the restrictive eating disorder protocol. Future research is needed to better understand the impact of the inpatient clinical pathway to improve care over time.

The original article has been corrected.
